

## The Sector Component Issues of JREITs' Implied Cap Rates

The Sector Component issues in calculating J-REIT Implied Cap Rates are listed below at the end of April 2011. Component issues are selected originally by STB Research Institute, using the criteria such as market capitalization weights and influences on the J-REIT market and other factors. We release the new graphs three months late on our website.

Notes;

1. Series of Implied Cap Rates are calculated from the issues with "●" marks in the table below.  
"All issues" includes the issues which management styles are industrial specialized, diversified or compound, meanwhile these sectors are not indicated here.
2. Newly listed issues subject to be the components are included in the calculation at the end of the following month of the date of IPO.
3. "Stock Exchanges" are the current listed exchanges. "Date of IPO" describe the date when the corporation listed on the initial exchange.

Security Code	Stock Exchange	REIT Name	Implied Cap Rates of major issues				Date of IPO
